Water

Water is supplied via Las Tablas Creek, which crosses the property, a pond and one well.

Located on a neighboring property are the Klau Mine and the Buena Vista Mine, in which mercury was mined and a mill site that processed the ore from these mines. In the early 1970s, use of the mines and mill site were discontinued. In the 1980s and further in early 2006 efforts were made to reduce the mercury discharges and contain/remediate the mines.

Due to lack of funds available to the EPA, complete remediation remains a future task, but the contamination to Las Tablas Creek and the pond have been substantially reduced as evidenced by the clear water in both.
